Ottawa, ON · zaidahmad8060@gmail.com · (613) 262-2906 · zaidahmad.dev · LinkedIn · github.com/zaidahmad16

Education

B.Sc. Computer Science, AI and Machine Learning Stream | *Carleton University* Ottawa, ON · *Sept 2024 – May 2028*

- CGPA: 7.3/12 Coursework: Data Structures & Algorithms, C/C++, Linear Algebra, Discrete Structures II, Web Applications

Technical Skills

Languages: C++, C, Java, Python, JavaScript, TypeScript

Frameworks & Libraries: React (Next.js), React Flow, Node.js, Express, Tailwind CSS, Framer Motion

Tools & Platforms: Git/GitHub, GitHub Actions API, Firebase, MongoDB, Supabase, Linux, Netlify, Render

Experience

Founder & Software Engineer | *BuildAtlas* Ottawa, ON · *Jan 2026 – Present*

- Architected a full-stack CI/CD pipeline visualizer in Next.js and Node.js using the GitHub Actions API, cutting debugging time by replacing raw YAML log inspection with an interactive graph view.
- Implemented GitHub OAuth and a backend service that parses live workflow data into node/edge graphs via React Flow, enabling visual pipeline inspection in under 2 seconds.
- Designed a modular API with typed route handlers and dedicated service layers, allowing new features to ship without refactoring core logic.

Logistics Coordinator | *cuHacking* Ottawa, ON · *Sept 2025 – Present*

- Coordinated scheduling, room reservations, and equipment setup for a 200+ participant hackathon, reducing day-of issues through detailed pre-event checklists and run-of-show documents.
- Managed inventory and resource distribution across 10+ teams, achieving zero shortfalls on event day through proactive planning and buffer stock tracking.

Hackathon Developer | *cuHacking 2025* Carleton University, ON · *Mar 2025*

- Built ShelterMatch Ottawa in 24 hours – a shelter-matching platform covering 15 Ottawa shelters – placing 2nd overall out of 40+ teams.
- Developed an Express.js backend with JWT auth, swipe history, and a filtered shelter API; deployed on Netlify and Render with zero downtime during judging.

Projects

BuildAtlas – CI/CD Pipeline Visualizer | github.com/buildAtlasOrg

Next.js · TypeScript · React Flow · Node.js · GitHub Actions API · Tailwind CSS

- Shipped a developer tool that fetches live GitHub Actions data and renders interactive pipeline graphs; built a Node.js transformation service converting raw workflow JSON into typed React Flow schemas with per-step status indicators.

ShelterMatch Ottawa | github.com/zaidahmad16/cuHacking-2025-Project

Next.js · React · Node.js · Express · Framer Motion · Tailwind CSS

- Built a Tinder-style shelter-matching platform with smart filtering across 15 Ottawa shelters; implemented JWT auth, swipe history, and a RESTful API in Express, deployed live at sheltermatchottawa.shop.

Multithreaded C Simulation Game | github.com/zaidahmad16/COMP2401-Final-Project

C · POSIX Threads · Semaphores

- Built a concurrent agent simulation with POSIX threads and semaphores, implementing custom deadlock prevention and manual memory management for stable execution across 1,000+ simulated ticks.

Personal Portfolio | zaidahmad.dev

HTML · CSS · JavaScript

- Designed and deployed a responsive portfolio with interactive UI elements, serving as the primary touchpoint for technical recruiters.
